

# John Smith

## Software Engineer

### Contact

#### Email

john-smith@gmail.com

### About

I have over a decade of experience in building modern, scalable web and mobile applications. I have architected, designed, and delivered complex software-as-a-service, and have extensive experience designing, building, and maintaining scalable microservices.

### Work

Jan 2018 – Sep 2020

#### Engineering Manager

Managed a team of engineers building high-volume, high-visibility projects, such as the Facebook app on iPhone and iPad

#### Highlights

- Worked in a dogfooding capacity for Facebook's internal products
- 

Feb 2015 – Dec 2017

#### Senior Software Engineer

Lead a team of developers in building a multi-sided market platform servicing airlines, hotels, car rental agencies, and travel agents

#### Highlights

- Implemented a highly scalable solution for powering a multi-sided platform using Java and Scala, using AWS and Cloudfoundry
- Built a resilient (and performant) application architecture using event-driven microservices and reactive programming

### Interests

#### Music

especially piano

### References

I have worked alongside John for over a decade. He is a passionate engineer who produces high quality code that is both maintainable and extensible. His work has always been above and beyond, and he is always willing to help out and mentor others.

mentor others.
