About

I am an experienced software engineer with a strong interest in creating innovative web applications. My primary programming language is Ruby on Rails but I have also created applications using Python, Java, and Javascript. I am also proficient in Linux and am comfortable working in a development environment that uses a variety of languages. I am a strong team player and have a proven ability to lead a development team.

Work

Jan 2018 – Sep 2020

Software Engineer

Worked on some of Google's core products like AdSense, AdWords, and Search

Highlights

- Responsible for all aspects of the feature development life cycle from concept to product launch.
- Worked with other teams to ensure user stories and bugs are well scoped and documented

Feb 2015 – Dec 2017

Senior Developer

Worked on a group within SAP that focused on content management, search, and user experience for the media.

Highlights

- Worked with other designers and developers to build a consumer facing website
- Created a dashboard to monitor the performance of the website

Interests

Running

References

Nate is one of the best web developers I have ever had the pleasure of working with. He is a very talented designer as well. Nate has always been a hard worker and is always looking for ways to improve himself and the products he is working

on.
