About

I am a professional software engineer with over 20 years of experience. My experience includes full-stack development, team leadership, architecture, design, and implementation. I have experience working in both government and commercial environments. I have extensive experience in Java and .NET on the server side, and with Angular, React and Node.js on the client side. I also have experience working with Postgres, Redis and MongoDB on the database server. I work well both as part of a team and independently, am a strong communicator and I am always keen to learn and improve.

Work

Jan 2018 – Sep 2020

Lead Software Engineer

I have lead teams of full-stack developers and QA engineers who develop and test applications using Java and .NET on the server side and Angular, React and Node on the client side.

Highlights

- I delivered software to production servers 34 times in a single month
- I was responsible for the SOC/SAT environment, identity system, and a range of other products

Feb 2015 – Dec 2017

Staff Software Engineer

I worked with a team of 3 developers as a leader to deliver a range of customer facing web applications using Java and .NET on the server side and Angular on the client side.

Highlights

- I developed developer and QA tools that are used by multiple teams today
- I delivered software to production servers 25 times in a single month

Interests

Sailing   **Home Improvement**

References

I have worked with Tim on a number of different teams and projects over the past 15 years. He has always been a leader and a very capable engineer who is able to work well in a team and also independently. Tim is one of the most solid engineers that I have had the pleasure of working with.
